

CT.Gov Portal

What is a Portal?

- A gateway or entry point to the Internet.
- A combination of content and services with a personalized touch for its audience.
- A search and retrieval tool.

What Does the CT.Gov Portal Offer?

- CT. Gov builds on the previously developed ConneCT design and is the next generation in State of Connecticut web services.
- A combined effort among state government agencies to make information and services easier to find and use.
- Single point of access to state information and services organized according commonly understood terms.
- Easier to manage than other web publishing processes and builds on computer skills most users already know.

What are Key Features of the CT.Gov Portal?

- Provides visitors with a single point of entry to the State of Connecticut web sites.
- Brings a common look and feel to participating web sites.
- Allows users quicker and easier access to information.

How Easy is the CT.Gov Portal to Manage?

- Provides a simple way to develop a web site without needing to know technical code.
- Allows easy editing of web pages through a web content management system.
- Offers highly specialized control features for managing the web site.
- Imports content from a variety of sources.
- Includes special features such as:
 - Approval Process prior to publishing
 - Calendar of Events
 - e-Alerts
 - Polling Surveys

How Can Your Agency Join the Portal?

Prior to launching your Portal Migration Project, it is helpful to do the following:

- Complete the Client Survey and send it to Angela Taetz at Angela.Taetz@po.state.ct.us
- Complete the [Pre-Migration](#) steps

Upon submission of your completed Client Survey, the Portal Management Group will contact you regarding your Portal Migration Project and expected timeframe. This will get you "in the queue" for portal migration.

To learn more about the portal, please contact the Portal Management Group at pmg@po.state.ct.us for an introductory presentation.
